

LIFTKAR[®] SAL NEWS

reliable ■ versatile ■ innovative

Have to transport heavy goods like these up and down stairs? Know the problem?

DOORS and PANELS

on STAIRS

The combination of our Liftkar SAL powered stair-climber and the new door and panel holder makes transport on stairs effortless, easy and safe.

- Quick and easy assembly - no tools required
- Suitable for all SAL models
- Can be retro-fitted at any time
- Folds away for easy stowage
- Can be used on all kinds of stairs
- Pivots to left or right

Easy to assembly – easy to use!

The unit is ready for use in next to no time because the door and panel holder is fitted without the use of tools - simply tighten the star knob (fig. 1) on the door and panel holder crossbar!

Position the load (doors, wooden panels, plasterboard, panes of glass and much more...) on the support platform, fit the side limiter profiles (fig. 3) and secure with the special belt provided (fig. 2).

fig. 2

fig. 3

Before moving away, rotate the load into the right or left limit stop – now you can transport the goods effortlessly using an ergonomically correct posture, and still see what you are doing! A huge advantage, especially in tight spaces with little room to manoeuvre.

All SAL stairclimber models can be retrofitted with the door and panel holder without any modification on the stairclimber.*
